Cortex KSPM Documentation - Detailed

Main branches (right side)

- 1. Kubernetes Security Posture Management (KSPM)
- 2. KSPM dashboard
- 3. Kubernetes Clusters
- 4. Kubernetes Resources Inventory
- 5. Onboard the Kubernetes Connector
- 6. Kubernetes connectivity management
- 7. Manage Kubernetes Connector instances

Top branches

- 11. Supported Kubernetes distributions
- 10. What's new in Kubernetes Connector?
- 9. Create prevent policy for Kubernetes clusters

8. Cloud Workload Policies and Rules

- 8.1. How policies and rules work together

8.2. Cloud Workload Policies
- 8.2.1. Types of Cloud Workload Policies
  - 8.2.1.1. Trusted image cloud workload policies
- 8.2.2. Cloud Workload Policies page
  - 8.2.2.1. Widgets panel
    - 8.2.2.1.1. Show or hide the widget panel
  - 8.2.2.2. Change the layout of the policies table
  - 8.2.2.3. Policy Details Panel
- 8.2.3. Enable or disable a Cloud Workload Policy
- 8.2.4. Create a Cloud Workload Policy
- 8.2.5. Use an existing policy to create a new Cloud Workload policy
- 8.2.6. Edit a Cloud Workload Policy
- 8.2.7. Delete a Cloud Workload Policy
- 8.2.8. Cloud Workload Preventive Action

8.3. Cloud Workload Rules
- 8.3.1. Default (pre-defined) Rules
- 8.3.2. Custom (user-defined) Rules
- 8.3.3. Cloud Workload Rules page
  - 8.3.3.1. Filter page results
  - 8.3.3.2. Change the layout of the rules table
  - 8.3.3.3. Rule details panel
- 8.3.4. Create a new Custom Detection Rule
- 8.3.5. Use an existing rule to create a new Custom Detection Rule
- 8.3.6. Edit a Custom Detection Rule
- 8.3.7. Delete a Custom Detection Rule
